

Moonwhale Ventures

- Crypto Fund and Asset Management -

Introduction: Moonwhale

A Blockchain Services & Investment Platform | HQ Singapore

Blockchain technology is improving business functions of value chains in many industries. Through tokenized assets or utility coins, EVERYONE is able to participate as investor in Initial Coin Offerings (ICO), Security Token Offerings (STO) or Initial Convertible Coin Offerings (ICCO / Equity). Moonwhale is supporting early stage fintech startups, and enables growth to existing businesses to potential IPO listing.

1

Identify Investment Opportunities

- We identify unicorn blockchain startup (Equity / STO / ICO) investment opportunities and impact-investment projects which fit your fund / risk strategies
- Hand-picked and catalyzed projects through our highly selective process
- Access to cryptocurrency and investment reports, and STO / ICO analysis
- Diversify your investment portfolio, and experience new liquidity of your assets

2

Due Diligence on Blockchain Projects

- Operational, financial and technical due diligence including:
- Business model and token economics validation, competitor and risk analysis
- Go-to-market and marketing strategy verification, regulatory and best practice confirmation
- Assessment of Distributed Ledger Technology (DLT), blockchain application and utilization, smart-contract validation

3

Crypto Asset Management

- High-growth investment opportunities in early stage / seed rounds (token / equity deals)
- Blockchain-based secure asset management and investment platform
- Self-managed or automated asset allocation to algo-bots and fintech-startups
- Moonwhale active fund management (\$100k minimum invest)
- Investment Protection & Risk Management (IPRM) practice and standard by Burj Financial
